

How to Install the Driver Clock-In App

on Your Android Phone

Simple step-by-step picture guide — takes less than 2 minutes

Your app link (fill in before handing out):

https://_____/driver

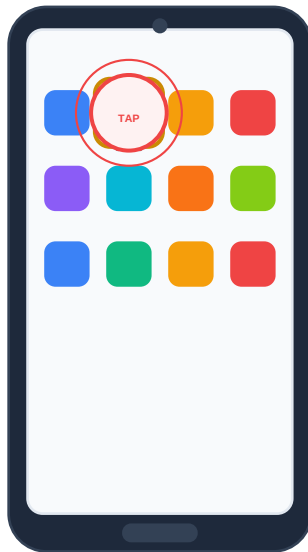

WHAT YOU NEED:

- 1 An Android phone (Samsung, Tecno, Infinix, iPhone — any brand)
- 2 Google Chrome browser on your phone (free from the Play Store)
- 3 The app link above — your manager will give it to you

This guide has 6 simple steps. Follow them in order.

Each step shows a picture of exactly what you will see on your phone.

1 Open Google Chrome on your phone

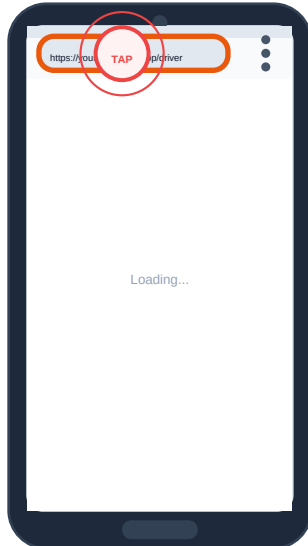

Find the Chrome app on your home screen. It has a round coloured circle icon.

If you don't have Chrome:
Open Play Store → search
"Chrome" → tap Install

The Chrome icon is a circle with RED, YELLOW, GREEN and BLUE — tap it to open the browser

2 Type in the web address (URL)

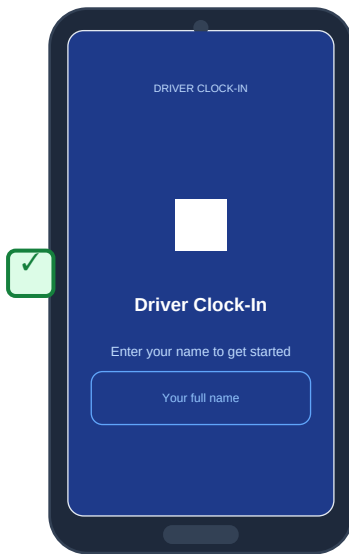

Tap the address bar at the TOP of Chrome (the white box).

Delete any text there and type your app link:

`https://_____ /driver`

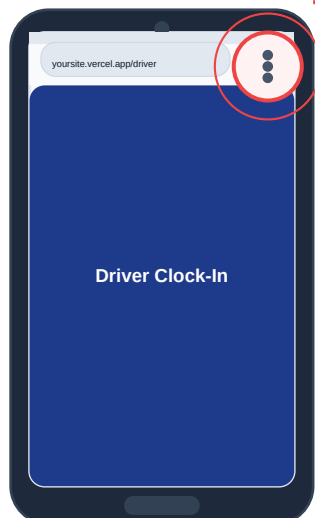

After typing, press the blue GO or ENTER key on your phone keyboard

3 You will see the blue Driver Clock-In screen

If you see this BLUE screen with a truck icon ■ and the words "Driver Clock-In" — you are on the right page!

You will be asked to type your name the very first time.

If you see an error page — check the link is typed correctly. Ask your manager to confirm the link.

4 Tap the THREE DOTS menu in the top-right corner

Go back to Chrome.

Look at the TOP-RIGHT corner of the screen.

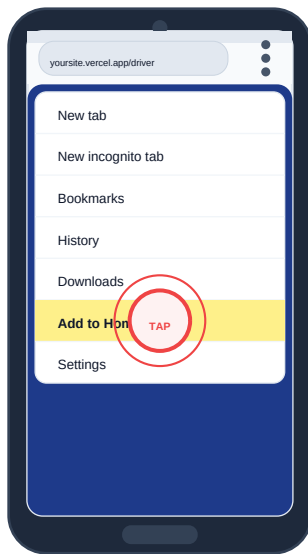

You will see THREE DOTS ■ stacked on top of each other.

TAP those three dots.

The three dots ■ are tiny — in the very TOP-RIGHT corner next to the address bar

5 Tap "Add to Home screen" from the menu

A menu list will slide down from the top-right.

Scroll DOWN in the list until you see **"Add to Home screen"**.

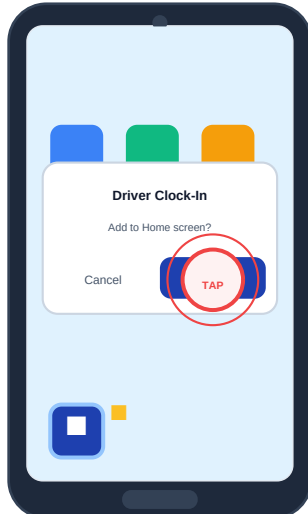

TAP it.

It is highlighted in yellow in the picture above. Scroll down if you can't see it immediately.

6 Tap "Add" — the app is now on your home screen!

A box will appear asking:
"Add Driver Clock-In
to Home screen?"

Tap the blue ADD button.

DONE! The app icon appears
on your home screen.
Open it like a normal app!

You are done! From now on, open the app directly from your home screen — no Chrome needed.

HOW TO USE THE APP EVERY DAY

Open the app from your home screen. The first time: type your name. After that it remembers you.

Then just tap the big button that matches what you are doing:

Button	Colour	When to tap this button
Clock In	 GREEN	When you ARRIVE at work in the morning
Clock Out	 RED	When you FINISH work
Lodgment Out	 PURPLE	When you LEAVE for lodgment
Lodgment Return	 YELLOW	When you RETURN from lodgment

■ When your phone asks "Allow location access?" — ALWAYS tap ALLOW

This records exactly where you are when you clock in. Without it, no GPS will be saved.

COMMON QUESTIONS

Q: I can't find "Add to Home screen" in the menu

A: Make sure you are using GOOGLE CHROME (not Samsung Internet or Firefox). Download Chrome free from Play Store.

Q: The page is not loading

A: Check your phone has mobile data or WiFi. Make sure you typed the link correctly — no extra spaces.

Q: I tapped the wrong button

A: Don't worry — tell your manager. They can see the records and note the mistake.

Q: The app icon disappeared from my home screen

A: Open Chrome, go to the same link again, and repeat Steps 4–6 to re-add it.
